

Literacy Minute

Talk, Talk, Talk

Talking to your child is important. The more you talk to your child, the more language they will develop. It is also important that children have the chance to practice their language by talking. Children who start kindergarten knowing lots of words do better all throughout school. You can encourage your children to talk more by:

- Talking about what you are doing
- Talking about what they are doing
- Talking about what they want to talk about
- Talking about what you see around you
